PrehKeyTec

MCI 30

Complex Applications

PrehKeyTec's programmability makes even the most complex application seem simple! Our unique design allows the user to program more than 100 key strokes behind each key providing the operator the ability to drill down into an application with a single key stroke. This advanced programmability helps simplify operator training and enhances data input.

Aggressive Environments

Our robust keyboards are designed to withstand "Heavy Fingers" and 30 Million key strokes, a metal base plate allows our keyboard to remain rigid in the most demanding environments.

Spills? Our keyboards are protected against spills and dust.

Designed specifically for heavy use applications, PrehKeyTec keyboards continue to perform long after others have failed. PrehKeyTec is so confident of the quality and durability of our German engineering, that a three-year warranty is standard on every unit.

Available in a compact Row & Column layout, the PrehKeyTec MCI 30 keyboard is well suited for Lottery, Payment Terminals, Grocery and Ticketing Applications.

Cable management - simplified
Stuck keys - impossible
Ugly equipment - gone
Learning curves - shorter
Counter space - increased
Down lanes - rarely
